Executive Summary

Active Directory Homelab (Windows Server)
Author: Kingsley Otoo

■ Objective

This homelab demonstrates my ability to design, deploy, and manage a Windows Server Active Directory environment. It highlights skills in domain services, automation, and security configuration that are directly transferable to professional IT roles.

■ Key Skills Demonstrated

- Windows Server installation and domain promotion
- Active Directory design (OU structure, users, groups)
- DNS configuration and domain networking
- PowerShell scripting for automation
- Group Policy configuration (password policy, security baselines)
- Backup and documentation best practices

■ Personal Statement

I am eager to apply my technical knowledge and hands-on experience in a professional IT support or systems administration role. My homelab projects demonstrate my commitment to continuous learning and ability to deliver structured, secure, and well-documented IT solutions.
